

AN APPEAL FOR THE LOCAL ELECTION 2026

Our democracy needs strong democrats

For that reason, go voting

The municipality is the seedbed for democracy.

On March 15. 2026, all of us as voters in the local election of Wetzlar and Lahn Dill district, will decide how democracy will be strengthened and revived on the spot.

Your cross on the ballot paper (voting slip) has got a direct effect.

It should ensure that our democratic parties and the people as well, who are engaged in diversity and justice, can represent our interests in the city council and in the district assembly.

Due to the increasing influence of right-wing extremists, of contemptuous positions for other people, this step will be of significant importance.

By casting our votes in the local election on March 15. 2026, we want to set a powerful signal for a society of solidarity in the city and in the district.

Each vote can decide if the real existing danger of power and influence of AfD and enemies against democracy, can be turned away.

The more people that go voting, the greater are the chances to force the AfD poll back.

A decisive target of our activities is therefore a high participation in the election and giving objective, factual information.

The Lahn-Dill Alliance for Democracy appeals to the democratic parties.

In order to decide politically competent and join the election in a motivated way, the broad alliance will set impressive emphasis by offering quite a lot of different activities in the run up of election.

We will follow the motto: act locally and think globally.

We will create and strengthen a city image of diversity and respect where everyone despite his origin, religion, skin colour, clothing, sexual preference, can live in social justice in accordance with the basic right of universal human dignity.

**With your vote you can safe-
guard a future worth-living**
• **in Wetzlar**
• **in Lahn Dill district**
• **for the people here.**

**Demokratiebündnis
Lahn Dill**

Wir halten zusammen: für Demokratie und Menschenwürde
